# Focusing on Color & Light

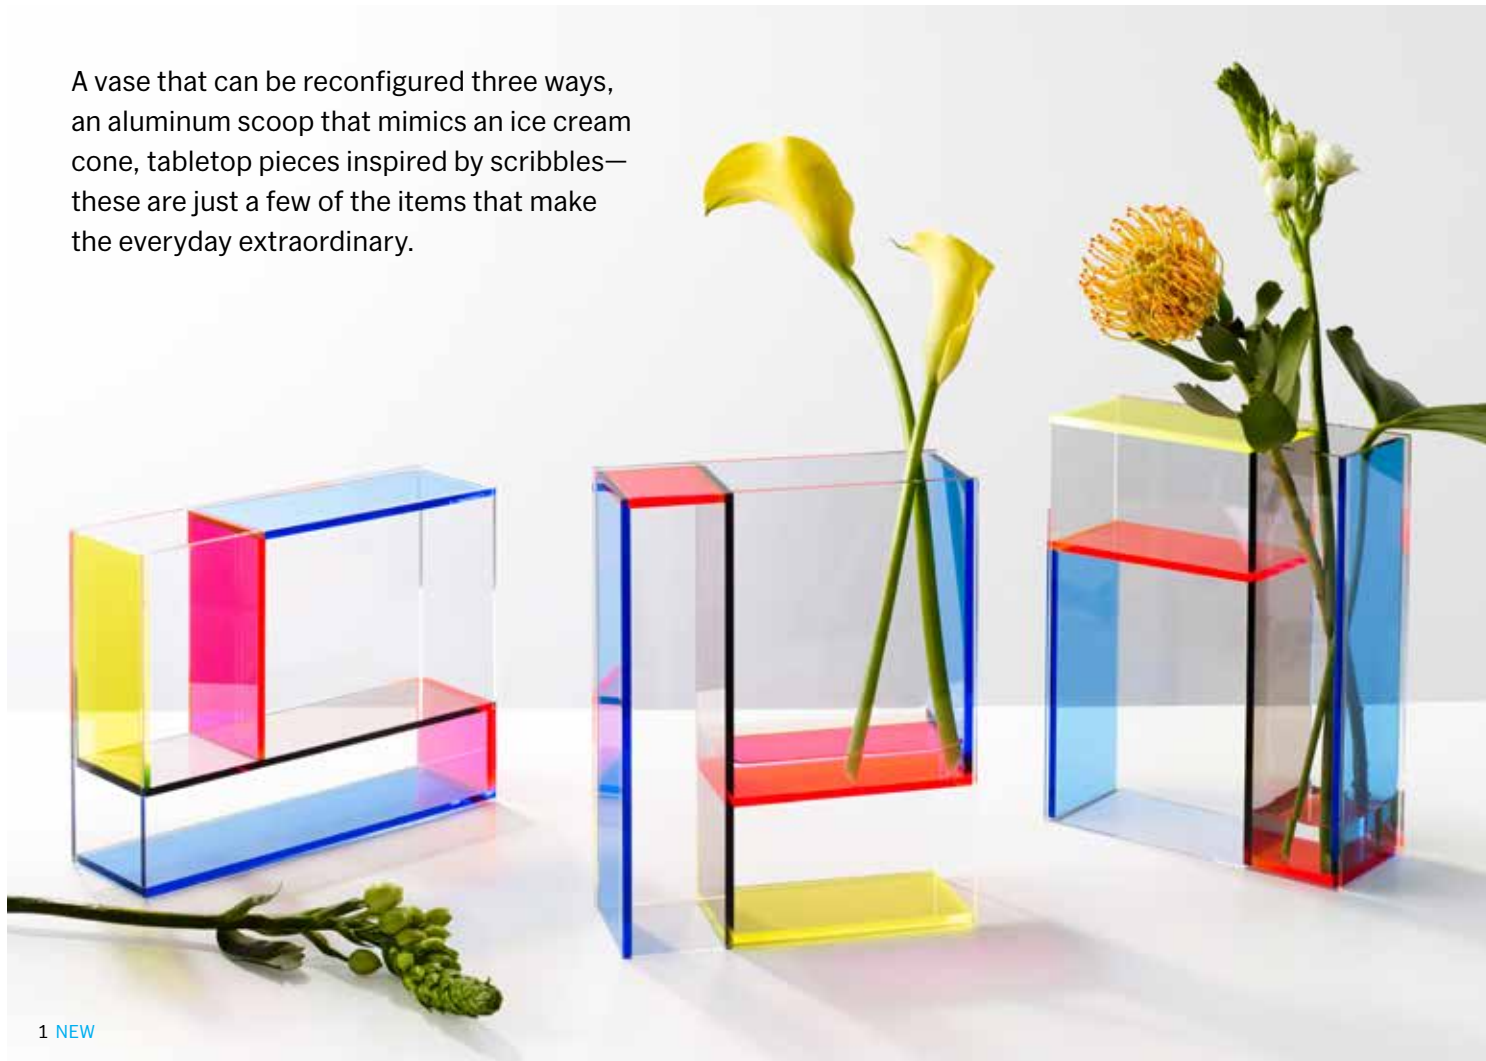

This year we're celebrating a new MoMA—a redesigned Museum with new galleries and spaces for performance, events and conversation. As we learn to look at art with new viewpoints, similarly our latest designs play with perspectives and new ways of seeing. Utilizing translucent materials, bold hues and unexpected shapes, these useful objects bring light and colorplay into our homes.

And remember: Proceeds from the sales of these products support MoMA's groundbreaking exhibitions and education programs.

A vase that can be reconfigured three ways, an aluminum scoop that mimics an ice cream cone, tabletop pieces inspired by scribbles—these are just a few of the items that make the everyday extraordinary.
